

## FEEL THE BENEFITS OF SOFT WATER

Water absorbs rust, iron, odours, dust, decaying matter just to mention a few! Municipality treatment systems remove some pollutants through chlorination but most of the raw minerals are still there. The choice is yours. You can live with these minerals and the cost and headaches that go along with them or enjoy the benefits and savings of clean soft water. After all, water is something you and your family use everyday and a GLWS Signature Series Water Softener is the answer.

- 22% savings on energy costs because refined water eliminates lime scale and raw mineral deposits that clog water pipes, toilet valves, shower nozzles, automatic washers, humidifiers, kettles and hot water heaters.
- Dishes, glasses and silverware sparkle.
- No white spots or streaks.
- Saves on costly repairs to your plumbing, fixtures and appliances.
- Hard water leaves soap curds and detergent deposits on your fabrics. This dulls colours and gives a grey or yellow appearance to whites. Bleach and fabric softening agents will no longer be necessary. Your clothes will last longer, and smell fresher.
- Chrome fixtures, sinks, bathroom tiles and shower doors will be spot free and gleaming with no scrubbing, abrasive cleansers or expensive cleaning products.
- No bathtub rings or stained toilets.

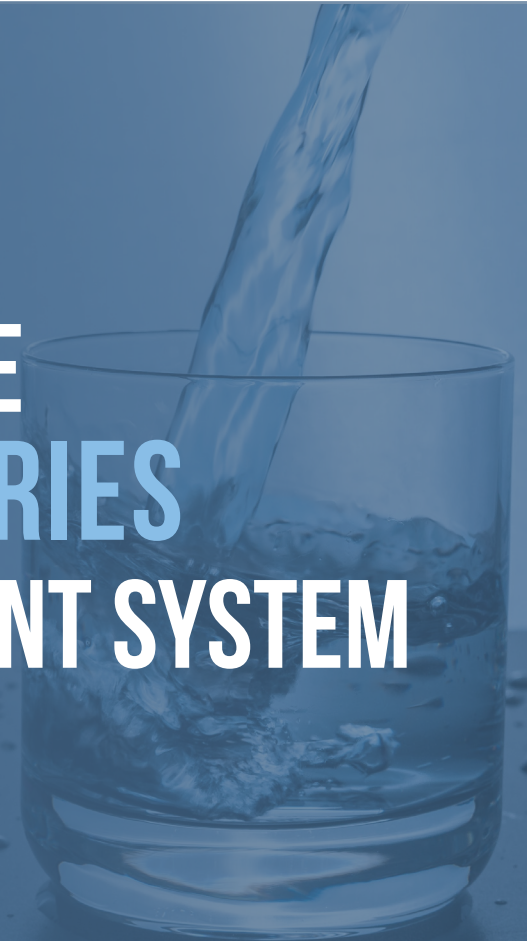

You can see how a water softener in your home will not raise your monthly budget, but lower it. It's a home appliance that pays for itself. It's not what you put in your water that counts it is what you take out.

### GREAT WATER DOESN'T COST MONEY... IT SAVES MONEY!

## YOUR FAMILY DESERVES GREAT WATER

## INTRODUCING THE SIGNATURE SERIES WATER TREATMENT SYSTEM

WE MAKE WATER GREAT!

GLWS SIGNATURE SERIES

WATER CONDITIONERS

Save money and FEEL the benefits of soft water!

**FUNCTION**  
No clogged faucets due to calcium buildup.

**EFFICIENCY**  
Appliances are more energy efficient.

**EXTENDED LIFE**  
Plumbing and appliances last longer.

**LOOK**  
Fixtures and appliances won’t tarnish or stain.

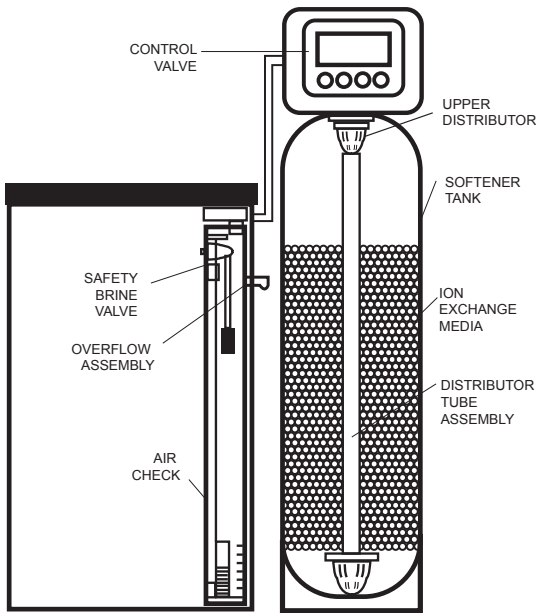

Our GLWS Signature Series Water Softener brings your household water to a new level of quality with the convenience of advanced controls and proven system performance. Its LCD display and metered microprocessor based controller simplify system programming and operation. Your Signature Series Water Softener does the rest. Laundry soaps and shampoos clean better than ever with less soap and less energy. Best of all, your Signature Series Water Softener will minimize system salt and water usage.

- Continually indicates the capacity remaining, flow rate, date and time.
- Programmable water hardness and salt settings.
- Water usage history screens. (1 day to 8 weeks)
- Adjustable regeneration cycle sequences. Programming can be adjusted to handle your exact water conditions.
- Push button simplicity. All settings and information.
- Non corrosive construction. All components are made of fiberglass, stainless steel or similar materials to provide years of service without rust or corrosion.
- Full Bypass Valve Included. Easy to use, single handle valve allows you to water the garden or yard with unsoftened water.

EXCLUSIVE CONTROL VALVE

The Signature Series electronic control valve meters water consumption and automatically initiates the regeneration cycle only when needed. The “brains” of the Signature Series adjust to your lifestyle and changing water usage, minimizing system salt and water consumption, while monitoring and recording system performance, including:

- LCD display with multi-language programming
- Programmable flow units (Gallon, Litre, m3)
- Programmable cycle steps
- Automatic regeneration based on water usage
- Water usage history data (1 day, 7 days, 8 weeks)

The Signature Series represents an advanced line of water softeners designed to handle the most demanding household needs. Whether the water is from a municipal source or a private well, the Signature Series water softeners are highly effective at removing unwanted hardness ions.

PROTECT YOUR DRINKING WATER

A GLWS Signature Series Reverse Osmosis drinking water system offers a convenient, affordable, environmentally sound alternative to bottled water.

While today’s tap water can contain a broad range of impurities and contaminants, GLWS Signature Series Reverse Osmosis systems tackle the broadest spectrum of water impurities possible. RO filtration reduces impurities including viruses, pesticides and odour, to dissolved metals like lead, and arsenic. Studies have shown that RO technology is one of the more effective technologies at reducing trace contaminants.
